

# Guidelines for the Internationalization of Chiba University

As a member of the Pacific Rim region, Chiba University aspires to create an environmentally responsible society in which man coexists harmoniously with nature.

## Promotion of International Research

- 1. Establish a leading international center for the creation of environmentally responsible society**
  - 1 ) Promote research based on a fusion of Eastern and Western knowledge
  - 2 ) Promote technical research for combating global warming
  - 3 ) Promote comprehensive research on building a sustainable society
- 2. Promote joint international research and host international research meetings**
  - 1 ) Promote joint international research on creating an environmentally responsible society
  - 2 ) Promote the hosting of cross-disciplinary international research meetings
- 3. Increase opportunities for exchanges between international researchers and Chiba University staff members and students**
  - 1 ) Expand the system for exchanging staff members with sister universities
  - 2 ) Promote joint international research and facilitate participation in international research meetings

## Promotion of International Education

### 1. Foster leaders of industry, academia and government

- 1 ) Cultivate talented individuals who can lead in the creation of environmentally responsible societies throughout the world
- 2 ) Cultivate talented individuals who can provide leadership in the fields of education, research and technology in every country
- 3 ) Cultivate talented individuals who can lead the internationalization of Japan

### 2. Promote joint international education projects

- 1 ) Enhance student exchange programs
- 2 ) Ensure that curricula and lectures meet global standards
- 3 ) Establish liaison offices to facilitate communication with sister universities

### 3. Promote exchanges of outstanding students who will contribute to the world

- 1 ) Welcome outstanding overseas graduate school students through the good offices of the alumni association and sister universities
- 2 ) Improve the system in order to increase opportunities for our students to study abroad
- 3 ) Promote international exchange of outstanding students

# Cooperative International Activities

## 1. Practice cooperative international activities by students and staff members

- 1 ) Promote cooperative international activities through the use of sister universities
- 2 ) Develop programs that combine practice and education
- 3 ) Develop and expand classes and group activities related to international cooperation

## 2. Implementation of projects based on partnerships with affiliated institutions

- 1 ) Partnerships with international and government institutions
- 2 ) Partnership with Chiba Prefecture
- 3 ) Partnerships with local communities

## 3. Support cooperative international activities through the Chiba University volunteer network

- 1 ) Foster student volunteers and internationally engaged NPOs
- 2 ) Promote education aimed at fostering international understanding
- 3 ) Promote projects involving communication with people of other cultures

# Building of a Global Campus

## 1. Make our campus congenial to international people

- 1 ) Make our campus more welcoming to international researchers and students
- 2 ) Display campus signs in multiple languages
- 3 ) Encourage interaction with people of diverse cultures

## 2. Expand IT-based public relations activities

- 1 ) Expand use of videos, our English language website, and other means of communication
- 2 ) Provide public relations and information in multiple languages

## 3. Develop the alumni association network and establish a database

- 1 ) Create overseas exchange programs
- 2 ) Build an overseas crisis management system

## 4. Cultivate and employ staff members who can promote internationalization

- 1 ) Expand opportunities for overseas study
- 2 ) Foster practical multilingual skills
- 3 ) Create opportunities for people with overseas experience
